

REQUIREMENTS FOR THE IMPORTATION OF DOGS AND CATS FROM THE SOUTH AFRICA INTO MALAYSIA

- A. Animal : Dogs and cats
- B. Country of Export : South Africa
- C. Purpose : Companion/working/breeding
- D. Requirement for importation :

1. Import Permit

1.1. The consignment of animal(s) shall be accompanied by a valid import permit issued by Malaysian Quarantine and Inspection Services Department (MAQIS) permitting the importation of such animal(s) into Malaysia.

1.2. The approval to get the import permit is also subjected to the breed of the animals (refer to clause no 6: List of Banned/Restricted Breeds of Dogs and cats and clause no 7: Conditions for the Approval of Importation of Restricted Breeds of Dogs)

2. Description of Animal

2.1. The consignment of animals shall be accompanied by an animal passport or certificate containing a full description and identification of the animals.

2.2. The animal shall be identified using an ISO (Std 11784 & 11785) compliant microchip implanted under the skin except with starting number 999.

3. Veterinary Certification

The consignment of animal(s) shall be accompanied by a valid Veterinary Health Certificate issued by the competent government veterinary authority of the exporting country within seven (7) days of export certifying that :-

3.1 No case of rabies had been reported to have occurred in an establishment / premises of origin for at least twelve (12) months prior to export

3.2 The animal has been continuously resident in the country for not less than six (6) months or since its birth and free from any clinical sign of rabies.

3.3 The animal has been vaccinated against rabies using rabies vaccine approved by exporting country for at least six (6) months prior to export according to the rabies vaccine manufacturer's recommendation. The animal shall have a blood sample taken for rabies antibody levels using FAVN or RFFIT not less than 3 months and not more than 12 months prior to export with acceptable result of 0.5 IU or more.

3.4 The animals shall be vaccinated within twelve (12) months prior to export with other core vaccine as recommended by manufacturer or license veterinarian.

3.5 The animal has been treated with a product effective against external parasites (fleas and ticks) between 2 and 7 days of export (state active ingredients and date of treatment) and with a product effective against internal parasites (nematodes and cestodes) between 2 and 7 days of export (state active ingredients and date of treatment).

3.6 The vaccination history status, treatment given and health status of the animal is up to date.

3.7 The animal has been examined and found to be healthy and free from any clinical sign of infectious or contagious disease, within seven (7) days prior to export and certification, and showed no any clinical signs and fit to travel on the day of shipment..

4. Transportation and Landing Place

The animals shall be carried by aircraft direct from the above countries to the prescribed landing place or any other airport in Malaysia.

5. Quarantine in Malaysia

Upon arrival the animal shall be placed in quarantine and detained in quarantine for compulsory period of not less fourteen (14) days. The animal will be released if found to be free of any evidence of infection. However, where deemed necessary the quarantine period can be extended based on risk assessment on a case-to-case basis.
